Making proposals

This section of the wiki is here for community proposals. Anyone may make a proposal. If you have a proposal for modifications to the [coding style guide](#) or [best practices](#) then please create a sub-page here. Once the page has been verified, proofed and accepted for inclusion, we will then move it into the main site.

If you have not already signed up to the mailing list then please see the [Getting Involved](#) section.

The current proposed items can be found in the sidebar or below within the child pages.
