

Table Occurrence Modifier Terms

Overview

When following the [Table occurrence naming](#) standards, the degree to which the **FunctionalArea** (or functional realm) in which a Table Occurrence applies, should be easily understood within the context of the whole solution. Therefore, the following list of suggested modifier terms can be used within the prefix portion of table occurrence names.

Modifier Terms

Layout indicates use as a Layout

Portal indicates TO use as a portal object

Filtered implies **Portal** with filtering turned on

Examples

```
CustomersLayout » People  
InvoicesLayout » People  
DashboardUnpaidPortal » Orders  
SalesRecentFiltered » Orders
```
