

Pre-hosting Checklist

This page contains items to ensure before hosting a file to FileMaker server or as a peer-to-peer host.

- Set the table listing **View By** popup menu setting (within the Manage Database dialog) to **custom**
- Set the field listing **View By** popup menu setting (within the Manage Database dialog) to **custom**
- Set the custom function listing **View By** popup menu setting (within the Manage Custom Functions dialog) to **custom**
- Make sure to set or clear any default global fields - creating a script to do this is helpful
