

Keyword expansion tools

There are a variety of tools which will expand a block of text based on the input of a simple keyword. For example, simply typing **sub** could expand to **Substitute (text; [searchString ; replaceString])**. The following list of software is capable of doing this.

Macintosh

- [TextExpander](#)
 - If you're looking for pre-established snippets for FileMaker then you can try [FMSnippets](#) by Camp Software
- [Typinator](#)
 - Ergonis provides a free set of snippets for FileMaker at <http://www.ergonis.com/downloads/extras/>
- [Spell Catcher](#)

Windows

- [AutohotKey](#)
- [Breevy](#)
 - Allows import of TextExpander (Mac) snippets.
- [PhraseExpander](#)
 - Can import from many other formats including TextExpander, Breevy, AutohotKey
 - Contact [Daniel Smith](#) if you want a copy of the phrases he uses for FileMaker
